# Some people are more critical of cars than others, and they are the ones we want specially to drive the solid new Plymouth

This car is built a new solid way by Chrysler Corporation engineers, It simply doesn't have many parts that work loose and need fixing in some cars. We'd like to answer some questions about this car now:

Q. What is this new way of building?

A. Chrysler Corporation's virtually trouble-free version of unit construction. Body and undersills are joined in a single unit of enormous strength, locked by close to 5400 welds. In Dura-Quiet Unibody, there is no frame and no conventional body bolts; struts, braces, etc., to loosen and rattle.

Q. What about power and performance?

A. There's the new 30-D Economy Six, a new "inclined" six that delivers outstanding economy in normal driving. The standard V-8 is the Fury V-800 which three times in a row topped its class in the Mobilgas Economy Run. Or you may choose the extra-cost SonoRamic Commando V-8.

If you ask as, this is the best built, best performing low-price car of all. Give it a real try soon, won't you?

A Chryster engaggered product, busit a new solid way to give you solid satisfaction.
